Professional Summary

Skilled Web Developer with **5.6+ years of professional experience**, specializing in WordPress and front-end web development. Successfully delivered **140+ live websites independently**, handling responsive UI, content, images, website customization, basic SEO, performance optimization, and deployment. Experienced in managing projects from development to delivery with strong attention to usability and responsive design.

Currently trained in **Python Full Stack Development**, including Python, Django, Flask, React, and MySQL. Seeking an opportunity to transition into a **Python Full Stack Developer** role and apply my strong web development foundation while building professional experience in full stack application development.

WordPress Website Projects (140+)

Independently developed and launched **140+ live WordPress websites** across different industries, with complete responsibility for website development and delivery.

- Developed responsive websites from scratch using WordPress, Elementor, WPBakery, HTML, CSS, JavaScript, and Bootstrap.
- Independently handled complete website execution including page structure, content placement, image selection, image optimization, responsive layouts, and UI customization.

- Implemented basic on-page SEO including meta information, heading structure, image alt text, internal linking, readability, and SEO-friendly page structure.
- Performed website speed and performance optimization, browser compatibility testing, mobile responsiveness, and basic troubleshooting.
- Managed WordPress themes, plugins, forms, menus, headers, footers, landing pages, and third-party integrations.
- Worked independently on client requirements, revisions, website updates, testing, deployment, and post-launch maintenance.
